## INSPECTION SPYBALL CONTROL UNIT

### Model SCPI-A

Weighing only 11 Kg and housed in a durable yellow Polypropylene case, this unit provides the ultimate in portable controllers for our new Inspection Spyball.

- Very portable at only 11Kg
- Weatherproof when closed.
- 15 inch Colour LCD Display
- Digital 8 Video Recorder
- Controls for Inspection Spyball
- Connection for microphone
- Built in audio speaker.
- External Video Typewriter socket
- Composite video and Firewire outputs
- Operation from 95 to 250 volts AC

A 15 inch colour active matrix TFT LCD display mounted in the case lid behind a scratch resistant Polycarbonate window displays a clear and bright image from the Spyball camera.

This display has a wide viewing angle, which allows the picture to be viewed by several people at once during recording and playback.

A Sony Digital 8 video recorder built into the panel has Composite Video and Firewire connections provided for post survey editing and copying without sacrificing quality.

Large panel mounted control buttons for Stop, Pause and Record have been added to simplify operation during surveys.

Date and Time are automatically recorded on the tape and can be superimposed on the display either immediately or during playback.

When required, a Video Typewriter can be connected to a socket on the panel to superimpose text on the screen.
